

Spinal Cord Rugby Injuries: Past, present and future

ANZSCoS 2021 – Pre-Conference Workshop

Wednesday 27 October 2021 – 1:30PM - 3:30PM (AEDT)

We are delighted to bring this workshop to you sponsored by NZ Rugby foundation. Chaired by Tanya Black, this workshop will highlight the changing face of Rugby related SCI and the brilliant initiatives and research work which has gone into reducing these injuries to minimum.

Dr Ken Quarrie has been instrumental over the decades with his pioneering research and has been at the forefront of prevention strategy in minimising the SCI related to rugby. He is our guest speaker and will give us a historical perspective and current cutting edge research and initiatives which make the game safer.

We also have Cody Everson, Wheel Blacks Captain talking on his lived in experience following school rugby injury which left him tetraplegic. He has defied the odds and his roadmap to Wheel Blacks captaincy is inspirational.

Please join in this incredible workshop to see first-hand the progress in prevention strategies over the decades.
